Initial Setup

1. Place the brush into groove.
   Align the center guide on the bottom of the robot.

2. Lock side brush into place.
   Line up the slot on the side brush with the slot on the robot.

3. Plug adapter into dock.
   Plug the power adapter into the power plug on the side of the charging dock.

4. Remove adhesive on dock.
   Remove the adhesive felt from the back of the dock to ensure a clean contact surface of the dock.

5. Set up charging dock.
   Place the dock against a wall, making sure the power cord will reach the wall outlet.

6. Flip power switch on.
   Flip the power switch to the UP position to activate the robot.

7. Flip charge robot.
   Charge the robot until the display reads “Charging...” and the robot will beep approximately 4.5 times.

8. Power button.
   Press the power button to start cleaning.
