Initial Setup

1. Insert side brush into groove
   Align the proper spines of the brush with the brush motor on the bottom of the robot.

2. Lock side brush into place
   Using a coin-like object, turn the brush clockwise until it clicks into place.

3. Plug adapter into dock
   Plug the power adapter into the power jack in the back of the charging dock.

4. Remove adhesive on dock
   Remove the clear adhesive film from the round pads on the top of the dock in order to ensure maximum contact.
   NOTE: The adhesive sticker is NOT permanent, and can be reused after cleaning with a moist towel.

5. Set up dock along wall
   Place docks against a wall, with no obstacles within 2 feet horizontally or either side of the dock.

6. Flip power switch on
   Flip the power switch to the ON position (+1).
   NOTE: If power switch is not on, your robot will not operate properly.

7. Fully charge robot
   Charge the robot until the red charging indicator light disappears. A full charge lasts approximately 4.5 hours.

8. Press Power Button
   Press the power button to start cleaning.

Setting the Clock and Daily Schedule

1. Enter clock mode
   Press the “CLOCK” button to enter clock mode. The flashing digits mean that the time is now adjustable.
   Notice that the “PM” indicator within Kbot will show the time set for the afternoon.

2. Adjust clock time
   Press the “ADJUST” button to change the time for the flashing digit.

3. Change selection
   Press the “CLOCK” button to move onto the next selection.
   This changes the flashing digit (min).

4. Repeat and finish
   Repeated steps 1-3 and complete the clock setting.
   When the digits have stopped flashing, you will have set the clock.

5. Enter schedule mode
   Press the “SCHEDULE” button to enter schedule mode. The flashing digit means that the time is now adjustable.
   Notice that the “PM” indicator will show when the time is set for the afternoon.

6. Set schedule time
   The process for setting the schedule is the same as setting the clock.
   NOTE: See the previous section titled “Setting the Clock.” We are sure to press the “SCHEDULE” button instead of the “CLOCK” button.
   The schedule time can be mostly setting increases by 15 minutes increments.

7. To cancel schedule
   Press the “SCHEDULE” button and adjust the time until the screen displays “- - -”.
   Press the “SCHEDULE” button again and the schedule indicator will turn off.
